

Instruction Sheet

If You Can't Scan with Sharpdesk

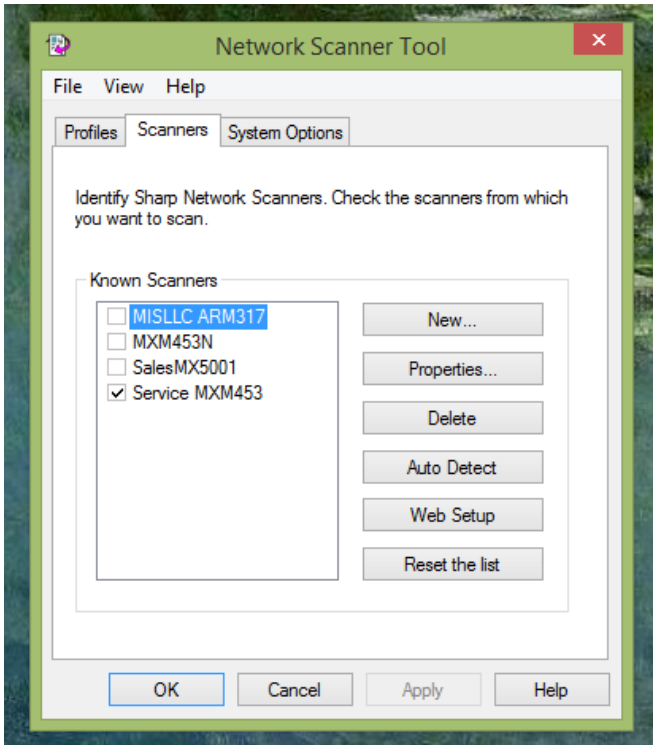

1. Look for the Network Scanner Tool icon  in your taskbar
2. Right click and select Open

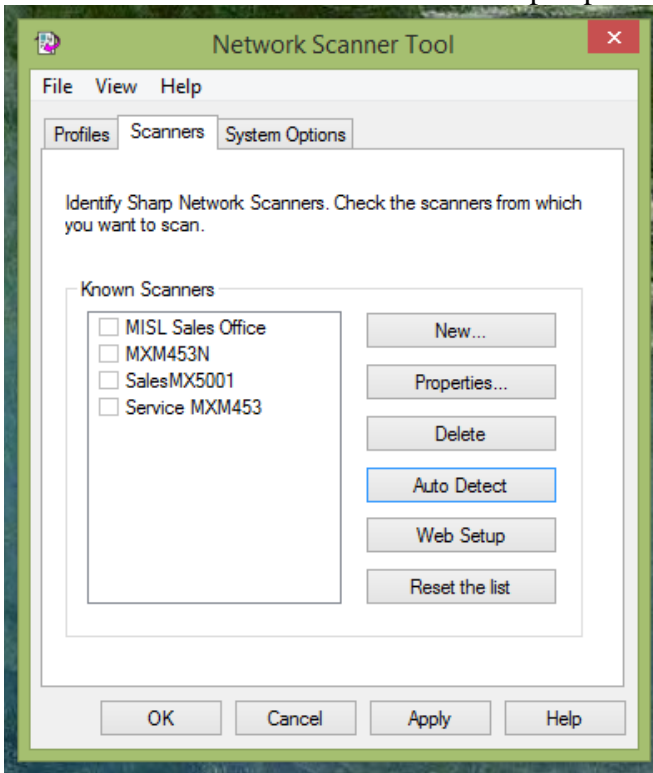

3. This is what you will see

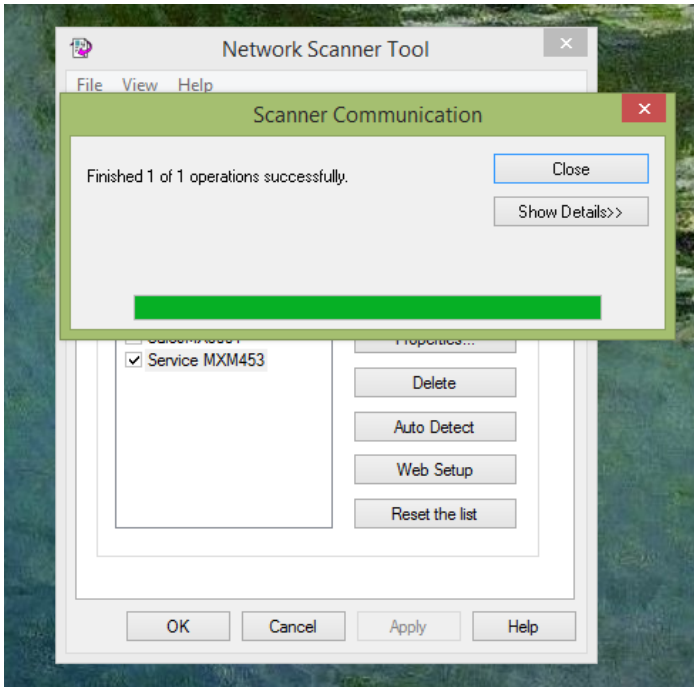

4. Click the Scanners tab

5. Click the checkmark to uncheck the Sharp copier and click Auto Detect

6. Recheck the Sharp copier and click Apply

7. After it is successful, close and click OK. You should be able to scan again.
